2. About 250 km north of Baku, on the coast of the Caspian Sea

Approved For Release 2002/08/14 : CIA-RDP83-00415R006700090005-3

is a secret Russian naval research station where a number of German scientists are employed. These scientists include prisoners of war as well as men brought from Germany. The source of this information has so far not succeeded in remembering the name of the place where this station is located (but hopes he will do so); however, he remembers that the name is identical with the name of one of the members of the Politbureau.
